SUMMARY PROFILE

Fullstack Developer & Web Developer with 2,5 years of hands-on experience building clean, responsive web apps. I specialize in turning UI/UX designs into fast, maintainable code using the modern JavaScript ecosystem. I also focus on technical SEO, API integration, and web performance to ensure applications rank well on Google, load quickly, and provide a smooth experience for users.

EXPERIENCES

Intern Front-End Developer, 3PM Solution

Dec 2025 - Jun 2026

- Developed and integrated core financial modules for an ERP web application using Angular, TypeScript, and RESTful APIs, utilizing Reactive Forms and FormArray to handle complex, dynamic payment methods.
- Resolved critical state management and data-binding bugs between dynamic interfaces and state print preview components, ensuring 100% data accuracy in financial reporting.
- Worked alongside UI/UX designers, backend engineers, and QA to transform wireframes into functional, well-tested web features with seamless API integration.

Hackathon ExplorAltion (Certificate ExplorAltion) Garuda Spark Innovation Hub

Nov 2025

- Ideated and pitched an integrated insurance + cybersecurity solution for e-commerce sellers
- Analyzed market pain points and competitive landscape for e-commerce account security
- Developed comprehensive business model and go-to-market strategy presentation

PT. DENZEN ARKATAMA Group, Web Developer

Present

- Architected and built a high-converting digital platform for a premium home renovation business, featuring dynamic service location routing, and real-time dashboard controls.
 - Crafted an award-grade, seamless interactive user experience using GSAP motion design, canvas image rendering, and Lenis smooth scrolling to maximize engagement and prospective client trust.
 - Scaled local search market coverage across multiple regions by engineering a Programmatic SEO engine with JSON-LD schema markup and a headless Puppeteer pipeline for dynamic social preview generation.
-

EDUCATION

Software Engineering, SMK Negeri 6 Malang

Jul 2023 - May 2026

- Focused on Software Engineering (RPL) with a strong interest in Frontend Development, Web developer, Mobile Developer and UI/UX Design. Actively participating in tech communities and school projects.

SKILLS

- **AI-Assisted Development & Prompt Engineering:** Leverage AI workflows and advanced prompt techniques to accelerate development velocity and optimize code quality.
- **Problem Solving & Analytical Thinking:** Strong analytical approach to debugging, system troubleshooting, and implementing efficient frontend logic.
- **Collaboration & Time Management:** Adaptable team player skilled in agile workflows, meeting deadlines, and delivering responsive web applications on schedule.
- **Linux Server Administration:** Experienced in deployment processes, including setting up VPS environments for personal projects and remote server hosting.
